

**FOOTPRINT PRO FILTRATION SYSTEM
FOR GAS FRYERS - 3 x 25 LITRE POTS**

Frymaster's FootPrint® PRO Filtration System is designed to extend the useful life of oil, while ensuring quality fried products. It is engineered with features that allow convenient use, easier servicing and the ability to use three different filter mediums with one pan.

This unit utilises gravity to drain oil into the filter pan leaving drain lines free of residual oil. The filter, housed beneath two or more FootPrint-ready gas fryers, filters fryers, individually, without filter movement from fryer to fryer. 25 Litres of oil can be filtered in about three minutes, while other fryers in the battery continue cooking. FootPrint® PRO Filtration System is suitable for fryers with a maximum capacity of 25L.
